

Weighing module Novego®

Hygienic all-in-one solution for reliable weighing of vessels

German Quality

! Your benefits

- Hygienic weighing module ensures efficient cleaning
- High degree of process reliability and precision thanks to the innovative side-force-resistant system
- Quick and easy commissioning due to smart add-on parts
- Durable, reliable weighing solution with excellent corrosion resistance

The weighing module Novego® was specifically developed to meet the increasingly stringent requirements of the food industry. This hygienic all-in-one solution boasts a range of innovative properties to ensure simple, error-free installation and maximum resistance to lateral forces.

Unique on the market: reliable measurement accuracy – even with high side forces

- ! Minimum **sensitivity to side forces**: the weighing module Novego® reliably absorbs lateral forces. The six strain gauges ensure maximum measurement accuracy and prevent incorrect quantities, even when using mixers.
- ! The **built-in height adjuster and innovative tilt correction** for sloped surfaces ensure intuitive installation of the Novego®, meaning it is ready for operation immediately.
- ! The **optimal accessibility** of all components enables quick, easy and efficient cleaning, and prevents soiling.
- ! The high **product quality and corrosion resistance** of the Novego® reduce set-up costs and machine downtime.

Novego®: one weighing module, a world of advantages

Novego® ensures process reliability, measurement accuracy and rapid cleaning. The exceptional corrosion resistance of the stainless steel and the product design in accordance with EHEDG guidelines make the weighing module resistant to dirt, water and even aggressive cleaning products.

Hygienic Design

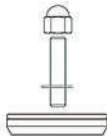

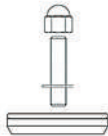

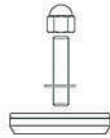

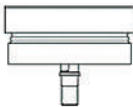

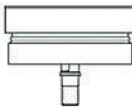

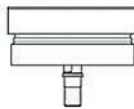

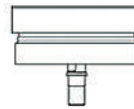

The weighing module Novego® was developed in line with the stringent design standards of the European Hygienic Engineering and Design Group (EHEDG).

Technological advancement is the sum of many small details

Everything you need for easy installation, built-in: mounting kit with height adjuster and tilt correction

Novego® offers innovative features for the food industry that ensure simple, error-free installation. By choosing this weighing module, you are opting for rapid, precise, hygienic assembly, and save yourself additional, time-consuming constringer alignment.

Error-free installation and exceptional corrosion resistance

Simple installation without time-consuming constringer alignment: the built-in 360° constringer makes incorrect assembly impossible. In addition, reliable compensation for side forces of up to 20% of the load ensures consistent, precise measurement results.

The stainless steel 1.4418 used to make the Novego® has a maximum roughness (Ra) of 0.8 µm, thereby meeting EHEDG requirements. It is especially corrosion-resistant and durable, as proven by the pitting corrosion potential of stainless steel 1.4542 as used in conventional load cells as compared to the stainless steel 1.4418 used for the Novego®.

Protection class and country-specific explosion protection certificates

Protection classes IP68 and IP69, in accordance with DIN EN 60529. The load cell can be submerged in water to a depth of 1.5 m for 10,000 hours, and is spray-proof. The weighing module is suitable for explosion sub-group IIC.
